Education and Certifications

BSc (Hons) Computer Science | Sheffield Hallam University

Sep 2024 – Present

- **Expected Grade: First**

A Levels | Chapeltown Academy, Sheffield

Dec 2022 – Jun 2024

- **Mathematics (A)**
- **Biology (A)** (Passed Practical Components)
- **Chemistry (B)** (Passed Practical Components)

Work Experience

Web Development and IT Intern | ProForce Security

Dec 2023 – Feb 2024

- **Improved UI and animations**, modernizing the company's WordPress-based website
- Provided technical support, **reducing internal downtime and improving IT efficiency**

Projects

EpochAI | Python, PostgreSQL, Pydantic, XGBoost

- Architected **scalable data pipeline processing 1M+ words** with automated collection/cleaning
- Developed **comprehensive unit tests** with **CI/CD via GitHub Actions**, pre-commit hooks, and type checking
- Designed database schema with **DAO patterns, service layer architecture, and Alembic migrations**
- Created **ML-based model** using XGBoost for political predictions with Monte Carlo simulations

Portfolio Website | React, Next.js, TypeScript, Cypress

- Built an interactive Windows-inspired UI with draggable windows, **custom themes, and responsive grid layout**
- Implemented **reusable components**, custom hooks, and **Cypress E2E tests** integrated into CI/CD pipeline
- Designed accessible, responsive UI with **touch support and screen-reader compatibility** via ARIA tags

Evalr | C#, AWS, Docker, Postman

- **Built modular REST API** for arithmetic and Boolean expression evaluation using Shunting Yard algorithm
- **Containerized using Docker** with CI/CD pipeline deploying to **AWS Lambda** via ECR with API Gateway
- **Integrated as a microservice** into the portfolio for live API demonstrations with **rate-limiting** via AWS WAF

Leadership Experience

Team Leader of LuckyNest | University Group Project for External Client

Feb 2025 – Apr 2025

- **Led a 5-person team** to develop a full-stack hotel and guest management system using PHP
- **Drove 100% of technical strategy and execution**, integrating **Stripe API** and **Two-factor authentication**
- **Client chose our project as the best solution** out of six teams and it was showcased by the university

Technical Skills

- **Developer Tools:** Git/GitHub, Docker
- **DevOps and Testing:** GitHub Actions, Cypress, Husky, Postman, PyTest, MyPy, Ruff, Pre-commit
- **Languages:** Python, JavaScript, TypeScript, C, C++, C#, SQL, PHP, HTML, CSS
- **Libraries/Frameworks:** React, Node.js, Next.js, Flask
- **Cloud and Database:** AWS, PostgreSQL, MySQL, SQLite
